

Installation of SAISIR for MATLAB

You must have a valid license of MATLAB.

A few **SAISIR** functions (`stepwise_regression`, `anavar1`, `anovan1`, `ca`, `ellipse_map`) require the *Statistics Toolbox* of Matlab).

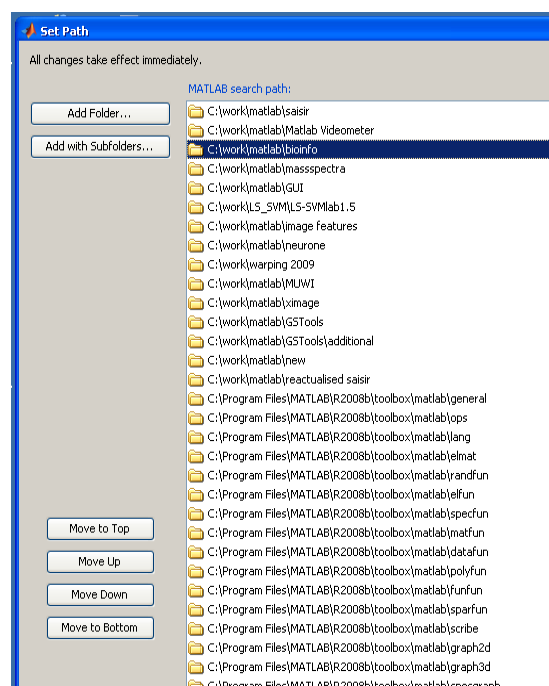

For installing SAISIR, copy the directory source on your hard disk.

Add this directory in your MATLAB search path.

For this purpose, run MATLAB and use the menu `file/setpath/Add Folder`

(see screen copy below)

You can verify that SAISIR is activated by the command `help <directory>`, in which `<directory>` is the name of the source directory of **SAISIR**

Example: Path of SAISIR added (here C:\work\saisir)
