

Content of the folder **MATLAB\Example**

This folder contains subfolder including script and data illustrating typical features of **SAISIR**.

- The folder `Benchmark` shows an almost exhaustive utilization of the function in **SAISIR**. It is mainly designed to show the formal inputs and outputs of **SAISIR** function.
- The folder `Getting started` gives some indication on the data format in **SAISIR**. You cannot begin using **SAISIR** without understanding it.
- The folders `PCA scenario`, `PLS scenario`, `Discrimination scenario` and `Multitable scenario` illustrate typical situations in chemometrical work.
